“21st Century Leaders has allowed for Northview Students to feel empowered in an academically stressful environment. They have learned to display their skills to the best order through various workshops focusing on applications and interviews. We also created a more socially responsible school through the various service projects we led or participated in. Overall, Northview High School and its surrounding community will benefit from 21st Century Leaders for the foreseeable future due to the emphasis on DEI and Community Service amongst the passion to be stronger leaders in the workforce.” -Le Chin, Advisor for 21CLub@Northview High School
